About Me

Aspiring Data Analyst with strong hands-on experience through **projects and internship exposure**, skilled in **Python, SQL, Excel, Power BI, and Machine Learning**. Experienced in data cleaning, exploratory analysis, dashboard development, and predictive modeling. Quick learner with a solid foundation in business analytics, capable of extracting insights, supporting data-driven decisions, and optimizing processes to deliver measurable results.

Skills

- **Programming & Libraries:** Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, SQLite3), R, HTML, CSS
- **Databases & Querying:** SQL, MySQL, PostgreSQL, MongoDB
- **Data Analysis & Cleaning:** Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Excel, Google Analytics
- **Data Visualization & BI Tools:** Power BI, Microsoft Excel, Tableau, Looker Studio
- **Machine Learning:** Supervised Learning, unsupervised Learning, NLP
- **Tools & Platforms:** Jupyter Notebook, GitHub, Google Colab
- **Soft Skills:** Effective Communication, Problem-Solving, Analytical Thinking, Quick Learner, Collaboration & Teamwork

Education

- **Diploma in Data Science with AI – [Ducat India](#)** **2025-2026 Expected**
Key Skills Covered: Python, SQL, Excel, Power BI, Data Visualization, Machine Learning and Deep learning.
- **Bachelor of Commerce (B. Com) [Delhi University SOL](#) (CGPA 7.14)** **2024-2027 Expected**
Relevant Coursework: Business Statistics, Financial Accounting, Corporate Finance, Financial Management and IT

Experience

- **Data Analyst Internship – [SkillCraft Technology](#)** **August 2025**
Designed 5+ real-world analytics modules, improving dataset comprehension for 200+ learners, reducing onboarding time by 15%. Built predictive models on datasets (Titanic, Bank Marketing), achieving accuracy improvements of up to 10%. Contributed to structured documentation, improving project tracking efficiency by 20%.
- **Data Science Intern – [CodSoft](#)** **June 2025**
Processed and analyzed 100k+ records using Python & SQL, ensuring 98% data cleanliness for predictive modeling. Developed ML workflows improving customer churn prediction accuracy by 12%. Automated data preprocessing pipelines, reducing manual effort by 30%.

Projects

- **Supply Chain Analytics – Data Analysis | [GitHub](#)**
Analyzed 10k+ shipment records to evaluate delivery performance, disruptions, and cost drivers. Performed data cleaning, EDA, and visualization to uncover inefficiencies and generate actionable insights for optimizing logistics.
- **AI Website Audit Agent System – AI/ML | [GitHub](#)**
Built a multi-agent AI system to analyze websites using web scraping and LLMs, generating performance scores, identifying issues, and delivering actionable insights and strategic recommendations.
- **Bank Transaction Analysis – SQL | [GitHub](#)**
Analyzed **50k+ banking transactions** using advanced SQL queries, joins, window functions, and aggregations. Identified transaction behavior, risk patterns, and account-level insights to support fraud and risk analysis.
- **Fitness Dashboard – PowerBI | [GitHub](#)**
Designed an interactive Power BI dashboard analyzing **5k+ fitness records**, enabling KPI-driven visualization of performance trends and improving insight generation efficiency by **40%**.
- **Airline Booking – Python “Pandas, NumPy, Matplotlib, Seaborn, SQLite3” | [GitHub](#)**
Developed an end-to-end data analysis pipeline on **30k+ booking records** using Pandas, NumPy, Matplotlib, Seaborn, and SQLite3 to clean, transform, and analyze time-based airline booking data.
- **Vrinda Store Annual Sales Report – Excel | [GitHub](#)**
Created an annual sales dashboard analyzing **100k+ transactions across 4 regions**, improving reporting efficiency, regional performance tracking, and business decision-making.
